ABSTRACT

Data on 1980 engineering and technology degree graduates are presented by curriculum and accreditation status. Each of 29 different engineering or technology curricula groups is listed in order, giving the schools offering such programs, number of degrees awarded at each level, and the number received by six special categories of students; i.e., women, foreign nationals, blacks, Hispanics, American Indians, and Asian/Pacific groups. The curricula titles include the exact title provided by each school. The tables also indicate those curricula that are accredited by the Accreditation Board for Engineering and Technology. In a few cases both accredited and unaccredited curricula are shown for the same school. (SW)

TO THE RECIPIENTS OF THE "ENGINEERING
AND TECHNOLOGY DEGREES-1980"

We have just become aware of an error in certain schools in the "Engineering and Technology Degrees-1980" report.

The attached errata sheet identifies the schools together with the correct data. For reasons which are still under investigation the reported data from these schools were incorrect in the published report. The overcount for BS degrees is 625 and for MS degrees 14. Phd degrees were understated by 2. These figures do not effect the total count significantly. The bachelors and masters totals change as follows:

	ORGINALLY REPORTED	CORRECTED COUNT
BACHELORS	58,742	58,117
MASTERS	16,941	16,927
DOCTORS	2,751	2,753

We indeed regret the error and will continue to investigate the cause to prevent a recurrence.

The following schools are the institutions in question:

University of California-Fullerton
West Coast University
University of Missouri-Columbia
SUNY College of Ceramic at Alfred University
University of Wisconsin-Platteville
Duke University
University of Miami

NOTE: Please be sure to secure this to the publication copy.

of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES
(formerly Engineers Joint Council)

November 1980

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

(FORMERLY ENGINEERS JOINT COUNCIL)

The American Association of Engineering Societies (AAES) is a national organization with more than 40 Member organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technical issues of national and international importance.

THE ENGINEERING MANPOWER COMMISSION

OF AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The Engineering Manpower Commission was organized in 1950 as part of Engineers Joint Council, now American Association of Engineering Societies, to serve as a focus for national technological manpower activity.

The Commissions' program is carried out through the collection, analysis and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand and utilization of engineering and technical manpower; to make recommendations, conduct programs and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Board of Governors of AAES."

EMC OFFICERS AND STAFF

Richard C. Fremon .....Chairman

Kenneth Brooker .....Vice-Chairman

Luke H. Noggle .....Chairman, Surveys Committee

Paul Doigan .....Chairman, Degree Survey

Patrick J. Sheridan .....Manager, Manpower Activities

Barbara Ann Howley.....Assistant

Rosanna Bonadonna.....Secretary

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is pleased to recognize the invaluable assistance of A. Earl Renner and associates in E. I. duPont de Nemours & Co., for the development of the computer program and the processing of the data for this survey. We appreciate the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. Over-all coordination and preparation of this survey was conducted by Barbara Ann Howley, assisted by Rosanna Bonadonna of Engineering Manpower Commission. Donald E. Irwin is consultant to the Engineering Manpower Commission Staff.

INTRODUCTION

Following the format established in 1976, this report on Engineering and Technology degrees awarded in 1980 again presents the data in three parts. Each of the three parts focuses on a different aspect of the engineering and technology degree data and is designed to present the statistics in the most useful and convenient format.

Part I, 64 pages, consists of degree data for each school arranged in tabular form with columns for the 21 most prominent curriculum groups, totals for the school and information on each school's accreditation and control status. There are separate tables for each of four degree levels in engineering, four in engineering technology and four in industrial technology. At the end of each table are summaries of the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian and Asian/Pacific), Women and Foreign Nationals included in the totals for each degree level. This data is useful to educators in planning curricula, and as an aid in career counseling. These summaries are useful as the most complete source of data on engineering and technology programs and degrees.

Part II, consists of 144 pages of detailed data broken down into each of six special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian and Asian/Pacific), Women and Foreign National students presented in the same format as Part I. Prior to 1976, such degree data was not available for both engineering and technology. Part II should be useful to business and industry employers in planning affirmative action programs to meet recruiting goals for minorities and women, and to all individuals who are concerned with the progress of the national effort to increase participation of minorities and women in engineering.

Part III focuses on curricula in greater detail than the other parts. Each of 29 different engineering or technology curricula groups is listed in order, giving the schools offering such programs, number of degrees awarded at each degree level and the number of special categories of students, i.e., the four minority groups (Black, Hispanic, American Indian and Asian/Pacific), Women and Foreign Nationals graduated from each school. Accreditation Board for Engineering and Technology (ABET) accreditation for specific curricula is designated for each curricula. A final set of tables summarize degrees at all levels of engineering and technology according to the detailed curriculum titles. Part III, 104 pages in length, enables users to find data on programs, affirmative action planning, etc.

For the convenience of users, these parts of Engineering and Technology Degrees-1980 are available separately or as a set. A separate report on Engineering and Technology Enrollments for 1980 is scheduled to be off the press during February, 1981. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

PART III

This part of the report presents the 1980 degree data grouped under more detailed curricula headings than Parts I and II. Taking each of 29 different curricula in turn, the tables list all schools reporting degrees in that field, the number of degrees awarded at each level, and the number received by six special categories of students, i.e., Women, Black, Hispanic, Asian/Pacific, American Indian, and Foreign Nationals. The curricula titles for the first time include the exact title provided by each school. This allows for specific or specialized reporting of programs. The tables also indicate those curricula that are accredited by the Accreditation Board for Engineering and Technology (ABET) according to the following codes: B = accredited at bachelor's degree level, M = master's degree level, A = associate degree level. The accredited designation is now complete for all the curricula. In a few cases both accredited and unaccredited curricula are shown for the same school. This information is provided only for the convenience of the user. The current list of accredited curricula published by ABET should be consulted for the definitive status of any particular program.
